4. 1. SR Sustainable model. general

Strong primary health care is the key to achieving health for all as it:

- 1. Addresses more than 80 percent of people's common health needs throughout their lives.
- 2. Saves and improves lives, with fewer children dying before their fifth birthday, and more people living longer, healthier lives.
- 3. Is efficient, detecting, preventing and managing people's illnesses before they become expensive to treat.
- 4. Is fair and equitable, providing all people with access to essential health services in their communities.
- 5. Protects global health security, helping communities detect and stop local outbreaks before they become global epidemics.

4.2. SSR Model in Health: PHCC- How

Conducting field survey on health facilities in the target area.

Arranging meetings with health facilities management.

Conducting a community assessment on health facilities.

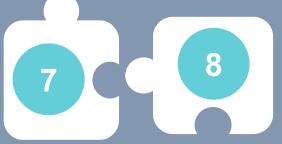

Investigating the facilities' needs and measuring the scale of effectiveness, depending on the national and international practices.

reviewing the national and the local development plans and the public health and population considerations.

Assessing the community needs and the beneficiaries' predictions.

Addressing and analyzing the complied data.

Consulting the experts and estimating the priorities

4.3. SSR Model in Health: PHCC- How

- Assessment of PHCs in terms of systems, resources, design, quality systems, traceability, monitoring, etc.
- Assistance in improvement plans in terms of trainings, renovation, implementation of new system, monitoring and follow-ups.
- Capacity building trainings and sustainable support in collaboration with major health NGOs and based on country local regulations
